

FULLSTACK DEVELOPER

THAÏS LABOURÉ

As a passionate web developer and frontend trainer for 7 years, I love bringing ideas to life through clear, elegant, and user-oriented code.

This year I have managed more than 10 customized projects and facilitated nearly 20 Qualiopi certified training courses with a 98% satisfaction rate.

PROFESSIONAL EXPERIENCE

WEB DEVELOPER

2024 - present

- Design and development of accessible, modern and user-friendly (UX/UI) websites
- Custom development in Vue.js, React or WordPress
- Automated deployment via Vercel, Netlify or O2Switch
- Average click-through rate (CTR) of 7-8% over the last 28 days, for an average of 500 impressions per site
- Average development time: 2 to 4 weeks | 5 stars rating on Google
- Clients: lawyer, kinesiologist, e-commerce, non-profit organization

QUALIOPi CERTIFIED FRONTEND TRAINER

2024 - present

- Facilitating 20 frontend, no-code and algorithm training sessions for career changers and employees
- 98% satisfaction rate – approximately 50 people trained
- Prospecting and managing 10 contracts per year with training centers (M2I, AJC, Dawan)
- Creation of original training plans and materials, adapted to different levels
- Qualiopi center administration and quality monitoring

FULLSTACK DEVELOPER

2023 - 2024

- Independent development of a back-office platform from scratch using React and React Admin: improving user experience and reducing time spent on each task, creating reusable components. Autonomy in technical choices.
- Built on a REST API using Node.js and Koa.js: improved SQL queries, creation of complex queries
- Maintained the existing MVC Symfony
- Running and improving React Native applications: creating new features and fixing bugs

FULLSTACK DEVELOPER & FRONTEND TRAINER

2019 - 2023 | Dawan, Lille, France

- Dawan Skills project development
 - Managing a team of 4 apprentices using Kanban on GitLab and code review. Training apprentices.
 - Feature development and refactoring of legacy code
 - Angular code architecture in different sub-modules
- Training
 - Facilitating over 100 front-end training courses (HTML, CSS, JavaScript, Angular, React, VueJS, NodeJS, etc.) for diverse audiences: career changers, employees, schools, inter-company and intra-company programs, beginners and experienced users. Nearly 3,500 hours of training delivered, with an average satisfaction rate of 97%.
 - Create and update training plans and materials

PERSONAL PROJECTS

BeeDesign: A simple and accessible component library in Vue.js and VitePress

AbraJS: A lightweight TypeScript library for HTTP requests based on Fetch, with IN and OUT interceptors, available on NPM
